About Our School Management System

ShuleSoft School Management System (SMS) is a comprehensive administration solution with the features and flexibility needed to support your school's unique needs.

Streamline management with student progress, alerts, invoicing, payment and balance information, customizable data elements/ reports/ forms and instantly available accreditation statistics. Mix and match distance and traditional classroom learning.

ShuleSoft (SMS) is easy to install, learn and maintain with initial load of existing data, one month of unlimited support and training with an inbuilt tutorial module.

Creativity is just connecting things. When you ask creative people how they did something, they feel a little guilty because they didn't really do it, they just saw something. It seemed obvious to them after a while.

- Steve Job's

FEATURES TABLE

SHULESOFT LIMITED

ID	FEATURE	DESCRIPTION
SMS 001	Dashboard	Advanced dashboard with multiple excellent statistics and widget It has a notice board with each department summary, user profile, user calendar, notifications, multiple language support and visitor statistics.
SMS 002	Role and Permission	Unlimited admin control over users and their responsibilities. The admin can add a role and allocate user roles to the new post.
SMS 003	Charts	The system has multiple clean charts that summarise information from different sections. We have set that automatically to show in the dashboard but also included critical analyses in each section of the system. You can monitor books, performance trends, student and teacher reports, school fee statements, library usage ... to list a few.
SMS 004	Student Information	Manage and track all student information beginning from their classrooms and other facilities they use. Students are admitted to a school and all their background data can be stored in our system for future references. You can check the students: Hostel info, Classroom info, library usage, Monitor performance and compare the result to other students, attendance, Promotion, awards and many more
SMS 005	Parent Information	Manage parent information for a particular student. This involves keeping contact details, address details, emails, visits to school, next of kin and any background information that may directly relate to the student
SMS 006	User Management	The admin can create new user roles and allocate them sections that they may need to view and perform a responsibility. The user may be given authority to view, create, delete or update data
SMS 007	Teacher information	Unlimited admin control over users and their responsibilities. The admin can add a role and allocate user roles to the new post.

SHULESOFT LIMITED

SMS 008	Online Payment	Our online payment system support Mpesa for Kenya and East Africa, Visa, MasterCard, PayUmoney and Stripe.
SMS 009	Grading System	We use an advanced but unique grading. Our templates can be customised and stored. They can be used later to grade different examinations differently
SMS 010	Exam Management	Create exams rooms, allocate exam rooms and send reminder notifications to students of that particular course of when and where exams take place.
SMS 011	Mark Management	Our advanced and easy to use marking system is dependent on the grading system and comments you enter there. The exams are marked by relevant teachers then uploaded manually or true an excel sheet to our system which will then process the marks and give provisional raw data before final data after necessary complaints from students are handled. The system would then send email notifications with the results and message attached to the parents and the students themselves.
SMS 012	Other Marks	Our system can be used to allocate non examinable marks to students. You just customize the grading and mark allocation of non-examinable areas like attendance to contribute some percentage of the results, library usage and many other. This can be disabled by the system administrator.
SMS 013	Import Data	To kill the time spending manual data input, we have designed our system in a way that you can import data on a single click to its database
SMS 014	Academics	Users given the responsibilities can manage a class, section, routine, subject & all academic responsibilities allocated in academic section

SMS 015	Assignment	Teachers can send assignments to students and manage them smoothly. For online assignment, a teacher can post exam questions or upload a document with questions which can then be marked online by the teacher or create structured questions with answers. The system would auto mark the exams and post the back to students. This exams are the posted in the online exam section
SMS 016	Attendance	Multiple user attendance like teachers & students. Teachers can make attendance for student and see report of every student attendance
SMS 017	Accounts	Privileged users can manage invoice & payments, but parents and students can only view and print their areas. The invoices are automatically generated with serial numbers and a unique blurred watermark to avoid fraud. You can set restriction like 'No doing Exams before payment of hostel, school or exam fees' which would restrict a user from getting the exam card hence no sitting for exam
SMS 018	Email & SMS	Privileged users can send email and sms to any user or user group bust students, parents, teachers and other secondary users can send emails among themselves
SMS 019	Library Management	Complete Library management system integrated with the system so that librarian can manage library books easily. Students and other users can borrow books from the system and also return the books the same way. Our library system supports free and payable online books. Librarian can award penalties to library users in case they do not take care of the books. This can also be reset by the library after the mess is fixed. The system has email reminders that reminds a user a couple of days or hours before the deadline is reached
SMS 020	Transport Management	Complete transport management system for users. It also has an optional payment plan for premium or classic users

SHULESOFT LIMITED

SMS 021	Scheduling	Privileged users can create exam schedules, class schedules and also timetables.
SMS 022	Hostel management	Our hostel management section can let a user access his/her room, view and read about the hostel info and also enables the hostel user borrow equipment's like brooms and dustbins for use in the hostel. The hostel fees can be set differently depending on which type it is.
SMS 023	Holiday	Privileged users set holiday from settings of the system. It also accounts for leave days for teachers and long or short holidays for students.
SMS 024	Promotion	After an academic year a privileged user like the academics master or system admin allocates cut off points or marks that would proceed to the next academic year. If the students meet the cut-off they are promoted but those who do not meet the requirements repeat the academic year.
SMS 025	Media	Media Sharing is dependent on a privileged user. PDF, Zipped and Unzipped folders and other documents can be posted in the media system so that all the directed audience can download it directly from the site. Our email system also allows for users to receive bulk data.
SMS 026	SMS gateways	The software has been integrated with: Twillio, Bulk, Clikatel, Sematime and Kenya's Safaricom
SMS 027	Notice Board	Unlimited admin control over notices. All notices appear in each user's dashboard

SHULESOFT LIMITED

SMS 028	PayPal	PayPal Integrated
SMS 029	Stripe	Stripe Integrated
SMS 030	PayUmoney	PayUmoney Integrated
SMS 031	Mpesa	Mpesa Integrated
SMS 032	2Checkout	2checkout integrated
SMS 033	Language	The system has 20 language support
SMS 034	Academic Years	The Administrators can change and set academic years for different students or classes.
SMS 035	Syllabus	The teachers and other privileged users from the academic department are able to view, create and update syllabus information

SHULESOFT LIMITED

SMS 036	Summary	The system auto generates collective data per section on a single click. It summarises individual teacher information, student, parent and class or section data.
SMS 037	Messaging system	Our system is integrated with different bulk SMS settings. The SMS settings include: Sematime, Safaricom of Kenya, Twilio, Bulk SMS and Clickatell
SMS 040	Backup	Our system comes with an inbuilt backup system for its database. It can be set to automatic backup mode in intervals or manual backup mode.
SMS 041	Settings	The system has a very friendly settings area. The admin has to feed in his or her purchase code and the system allows him or her to make changes.
SMS 042	Auto Invoice	Automatically generate invoice for, dormitory, bookshop, exams, library, transport, hostel.
SMS 043	Auto Receipt	The receipts are available for download after payment and is automatically sent to the payer's email address
SMS 044	Mail &SMS template	The mail and sms system allows the user to use its advanced features to create email templates to be used in sending messages to different audiences enrolled in our system.
SMS 045	Password reset	Each user in the system is only added after they qualify the application process to join the learning institution. Afterwards the new user is asked to submit admission details and a password is automatically generated for the student, parent or guardian. The new users can login the system and change the password details in their user dashboard. The system auto generates email addresses when the admin sets it to do so

SHULESOFT LIMITED

SMS 046	Visitor management	With an advanced visitor management tool, the receptionist or a privileged user can be able to view and track visitor movements in the school. The system is built with an easy to integrate CCTV module which keeps record and track of visitor movements and records that are entered by the receptionist.
SMS 047	Online Examination	Our system is built with an online examination system that has a performance tracker and can also be integrated with the final school result by setting the percentage it would count. The tutor only sets structured questions and possible listed answers to them where the system will mark and submit the result with an automatic performance line graph. The tutor can also set the test and manually mark the result too.
SMS 048	Event management	Our inbuilt calendar and event management system notifies all the users in the system of any activity that is takin place. This is good for accountability
SMS 049	Security System	Our advanced security system can be integrated to work with alarms, fire extinguishing systems and CCTV. A privileged user or a chief security officer is able to command the whole security in one sitting. Through the CCTV, they can view the whole institution, alarms can be raised in cases of concerns and automatic fire extinguishing equipment can be used to extinguish raging fires.
SMS 050	Appointment System	Our system has departmental and individual appointment system depending on the privileges set. The appointment system auto sets an appointment ID and generates a series of timestamps as the user can manually allocate how long each appointment time can take.
